### DETAILED ACTION

Applicants' communication paper # 12 dated 10/9/03 is acknowledged.

Applicants have cancelled claims 2-36,38-51, 54-64, amended claims 1,37,52,53,65,66, and presented new claims 67-70. Therefore, the claims in this application are the claims 1,37,52,53,65-70.

After further review and reconsideration this application is found not ready for allowance at this stage for reasons stated below. e.g. various intermediates as claimed herein are not excluded by the proviso, and the claim1 encompasses compounds already known in prior art(s). See enclosed copies of the Chemical Abstracts with this communication and additionally, 35 U.S.C. 102(b) rejections. (1) Chemical Abstr. DN 103:37081 with CASRN # 97183-62-5;(2) Chem.Abstr. ### ***Election/Restrictions***

1. Applicants' election without traverse of invention of Group III in their paper #9 dated 3/17/03 is made FINAL.
2. Rejections withdrawn:

2.1. The rejection made under 35 U.S.C. 102(b) has been made moot by applicants' amendments to claim 1 to delete that L can be a valence bond. Therefore, the same has been now withdrawn.

2.2. Applicants' above stated cancellation, amendments and presentation of new claims together with their arguments and remarks are sufficient for the withdrawal of rejections made under 35 U.S.C. 112 paragraph second. Therefore, the same have been now withdrawn.

3. New Rejections:

***Claim Rejections - 35 USC § 112***

3.1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and dependent claims 37, 52, 53, 65-70 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(A). Amended claims 1, 37 recite component(s) as heteroaryl, e.g. R9. The claims remain silent about the number nature and exact make up of heteroatoms, the exact ring size, their exact point of connection with the N of the bridge when present.

Specification on page 7 defines "Heteroaryl", which also includes the partially hydrogenated derivatives in addition to "optional substituents" as outlined in the claim 1.

The claims do not exactly state the heterocycles excluded, and this will raise additional issues related to patentable distinction of the novelty. Recitation of the compounds of invention of Group III already made and tested from the examples

actually made in specification pages 55-171 is required. See rejections under 35 U.S.C. 102(B) and allowable subject matter bellow.

(B). Amended Claim 65 recited as: "A method of the treatment of disorders or diseases wherein an activation of the human GFLP-1 receptor is beneficial", is not a single disease or disorder. Recitation of specific disease(s) as per the tests conducted (see specification page 166) is required. e.g. decrease in weight in patients with Type 2 diabetes.

***Claim Rejections - 35 USC § 102***

3.2 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(1). Claims 1, 37,52,53,65-70 are rejected under 35 U.S.C. 102(b) as being anticipated by Bata et al (WO9719934, also cited as CAPLUS DN 127:95295)).

The ref.'934 teaches compounds with CAS RN #: 1). CASRN # 192075-86-8(= 2,3-QUINOXALINEDIAMINE, 6,7-DICHLORO-);2). CASRN# 192075-88-0(= 2,3-Quinoxalinediamine, 5,7-dichloro-;3). CASRN# 192075-91-5(= 2(1H0-quinoxalinethione,3-amino-6-chloro-7-(trifluoromethyl)-, which is equivalent to its thiol (= -SH) tautomeric form(s) as claimed herein;4). CASRN# 192075-92-6(= 2(1H)-quinoxaline thione, 6-chloro-3- (methylamino)-7-(trifluoromethyl)-;5).CASRN# 192076-03-2(=2(1H)-Quinoxalinethione,3-amino-7-chloro-

6-(trifluoromethyl)-; 6). CASRN# 19076-04-3(= 2(1H)-quinoxalinethione,7-chloro-3-(methylamino)-6-(trifluoromethyl)-.

(2). Claims 1, 37,52,53,65-70 are rejected under 35 U.S.C. 102(b) as being anticipated by Sam et al(U.S.P. 4022777, also cited as Chemical Abstract DN 87:68423 with a list of several patent family numbers).

Sam teaches compounds with CASRN #: 1).CASRN# 52312-43-3(=Acetamide, N-(3-amino-2-quinoxaliny)-;2). CASRN# 52312-40-0(=2,3-quinoxalinediamine,6-chloro-;3). CASRN# 52312-41-1(=2,3-Quinoxalinediamine,6-fluoro-;4).CASRN#52312-42-2(=2,3-Quninoxalinediamine,6-bromo-.

(3). Claims 1, 37,52,53,65-70 are rejected under 35 U.S.C. 102(b) as being anticipated by Wozniak et al(Indian J. of Heterocyclic Chem.,4/2,75-80(1994)).

Wozniak teaches making of compound with CASRN: 1). CASRN# 163388-61-2(= 2,3-quinoxalinediamine, N,N'-dimethyl-6-nitro-;2). CASRN# 163388-62-3(= 2,3-quinoxalinediamine,N2-methyl-6-nitro;3). CASRN# 163388-63-4(=2,3-quinoxalinediamine,N3-methyl-6-nitro-.

(4). Claims 1, 37,52,53,65-70 are rejected under 35 U.S.C. 102(b) as being anticipated by Kyowa et al(JP 55167205, also cited as Chemical Abstract DN 94:169423).

Kyowa teaches making of compounds with CASRN: 1).77186-60-8(=2-quinoxalinamine,N-ethyl-3-methyl-;2).CASRN# 77186-61-9(=2-quinoxalinamine,3-methyl-N-propyl)-;3). CASRN# 77186-63-1(=2-quinoxalinamine,N,3-diethyl-;4). CASRN# 77186-64-2(=2-quinoxalinamine,3-ethyl-N-propyl-.

**Conclusion**

**Allowable Subject Matter**

4. Claims 1, 37, 52, 53 related to compounds & composition would be allowable for the subject matter of invention of Group III( wherein the variables are as species of Example 103, the component -NR9 has specification and exact R9 component from the species made, and the intermediates not included in the references cited above), if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph and other rejections, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 65-70 related to method of use of the compounds of invention of Group III would be also considered for allowance, if limited to a single disease, and also rewritten to overcome the rejections as stated above in this communication.

4.1. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art(s)ref. Englehardt et al(DE 2433397) teaches Quinoxaline, 6,7-dichloro-2-(1-piperazinyl)-monohydrochloride.

4.1.1. The ref. '397 differs from the instant compounds by not having N of instant -NR9, and also the -L-A component is absent.

4.1.2. The other ref. Page et al(Chemical Abstract DN 129:224913, also cited as ACS, Inorganic Chemistry, 367/17,4452-4459(1998) teaches quinoxaline, 6,7-dichloro-2,3-di-2-quinoliny-.

Page differs from the instantly claimed compounds by not having bridged similar to instant -L-A & -M-B.

Neither Englehardt nor Page indicate or suggest to arrive at the allowable subject matter of invention of Group III.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
